

LET IT FLOW.

LOBA HP20.2 HIGH PRESSURE FUEL PUMP

When your standard High Pressure Fuel Pump no longer performs to a sufficient level, it's time for an upgrade. **Time for LOBA Motorsport Upgrade High Pressure Fuel Pump.** Thanks to the **best components**, a sophisticated, multi-stage production process, **highest quality** and its **excellent price-performance ratio**, LOBA Motorsport is the Upgrade High Pressure Fuel Pump of **choice for professionals** in the tuning scene.

- ***much higher and constant pressures***
- ***much better fuel supply***
- ***in-house pistons and cylinders***
- ***custom latest generation alloys***
- ***special hardening process***
- ***micron grinding process***
- ***diamond-like carbon (DLC) coating***

A brand-new standard High Pressure Fuel Pump by Hitachi forms the basis of this pump. To increase performance and efficiency, LOBA Motorsport replaces the performance-critical components in the interior of the pump body using **in-house pistons and cylinders**.

These are processed in multi-stage production processes adhering to very tight tolerances using **custom alloys**, and are put through a **special hardening process**. LOBA Motorsports runs a sophisticated **micron grinding process** with a precision of up to **0.0002"**. The pistons are given a **special coating known as diamond-like carbon (DLC)**.

Because of its special construction technique, surface quality and their unique contours the LOBA Motorsport components allow for **much higher pressures and better fuel supply**.

The assembly of this High Pressure Fuel Pump does not differ from that of a conventional standard pump. The differences lie in the performance and the driving pleasure. **Order now and be convinced.**

Product name	LOBA HP20.2
Product number	2012200
Compatible engines.....	VAG 2.0 TSI/TFPI - EA888
Modifications and upgrades	<ul style="list-style-type: none">• LOBA Cylinder• LOBA Piston (Diamond-Like carbon (DLC) coated)• LOBA Pump body modification
